ROCKWELL HALL MINOR IN BUSINESS ADDITION BREAKS GROUND

Fort Collins, CO – Colorado State University broke ground Thursday, October 2, on the new Minor in Business Addition to Rockwell Hall. The new addition will expand the building by 50 percent of its current size. It is expected to include high tech classrooms, student team rooms for collaborative learning, conference/meeting rooms, 112-seat grand auditorium, server room, finance and trading room, and a student forum with coffee bar. The facility will be located on the west side of Rockwell Hall, with a second level enclosed bridge to provide internal circulation between the facilities.

Shaffer • Baucom Engineering & Consulting (SBEC) was selected by Colorado State University and Davis Partnership Architects to design the mechanical and electrical systems to support the 40,500 SF, \$17.5 million expansion. In support of energy efficiency, many special considerations have been made by SBEC to reduce energy consumption including: low-flow plumbing fixtures, utilization of CO₂ demand-controlled ventilation and day-lighting controls.

The Minor in Business Addition to Rockwell Hall is scheduled to be completed by January 2010, and is expected to achieve LEED-NC v2.2 Gold Certification.

Shaffer • Baucom Engineering & Consulting is a full-service Mechanical and Electrical Engineering Design Firm specializing in LEED® compliant design and documentation, sustainable design, healthcare facilities, research laboratories, higher education facilities, K-12 facilities, bio-hazardous facilities, central utility plants, pharmaceutical production plants, clean rooms, commercial and medical office buildings, master planning, systems analysis and forensics.
