SHAFFER • BAUCOM ENGINEERING & CONSULTING CELEBRATES ANNIVERSARY

Lakewood, CO – Shaffer • Baucom Engineering & Consulting is pleased to announce the celebration of its 12-year anniversary. From humble beginnings to exceptional success, SBEC has been serving clients in Colorado and Wyoming for more than a decade. Located in Lakewood, Colorado, SBEC was founded to provide superior engineering and consulting services to institutional, industrial, federal and commercial clients. Collectively, SBEC's Senior Mechanical and Electrical Engineers represent one of the regions most up-to-date, complete and qualified group of design individuals in the areas of healthcare, higher education, K-12 education, aerospace, industrial and science + technology facilities design.

Prominent projects over the last 12 years include Boulder Community Foothills Hospital, the first hospital in the nation to achieve a LEED rating (Silver); University of Colorado at Boulder Leeds School of Business, which achieved LEED Gold in 2007; Bethke Elementary School, the first school in the nation to be certified under the "LEED for Schools" category (Gold); Lockheed Martin Space Systems GPF III; Parkview Medical Center East Tower Addition; Colorado State University Rockwell Hall Expansion, projecting LEED Gold; University of Colorado at Denver Education II / Academic Office East Facility; and numerous projects for Craig Hospital.

SBEC was founded in 1998 by Dennis Baucom and Gary Shaffer and started out relatively small. "We briefly worked out of Dennis' house on Raccoon Creek Golf Course," explains Mr. Shaffer. At the time, the firm consisted only of Dennis, Gary and two other employees. "We've grown steadily to a staff of 26, providing mechanical, electrical and plumbing solutions for large, complex projects and long-term owners." Today, the SBEC organization consists of a highly qualified and motivated team of mechanical and electrical engineers, senior construction administration specialists, designers, CAD operators, and support staff. More than 75% of SBEC's engineers are LEED® Accredited Professionals.

SBEC's first clients included Parkview Medical Center, Craig Hospital, the University of Colorado at Boulder and the Colorado Department of Human Services. Mr. Shaffer adds that SBEC continues

MORE

to provide M/E/P design services to those clients. “We have been working with this firm since it got started in business,” says Mr. Vince Velasquez, Director of Facilities Management and Construction for Parkview Medical Center. “They have helped in the development and design of hundreds of projects for all of our facilities. They have done an outstanding job, and have been an integral part of the success of our hospital throughout the years.”

“Environmental control and energy efficiency have always been paramount areas of my overall mission here for our patients and this facility,” adds Mr. Lee Means, Director of Engineering for Craig Hospital. “[SBEC] has been involved from the beginning of all projects, as well as our master planning for the future. They are an integral part of my construction team.”
